

[1] Instructions for installing the PostFinance Checkout payment plug-in for Joomla/VirtueMart shop

Requirements: you need an up-to-date version of Joomla with the VirtueMart shop. In addition, you must have a PostFinance Checkout account with activated Joomla/VirtueMart integration and associated user and Space IDs as well as an authentication key. Instructions for registration can be found in section [2] of this manual. You also need the VirtueMart payment plug-in from masterhomepage.ch

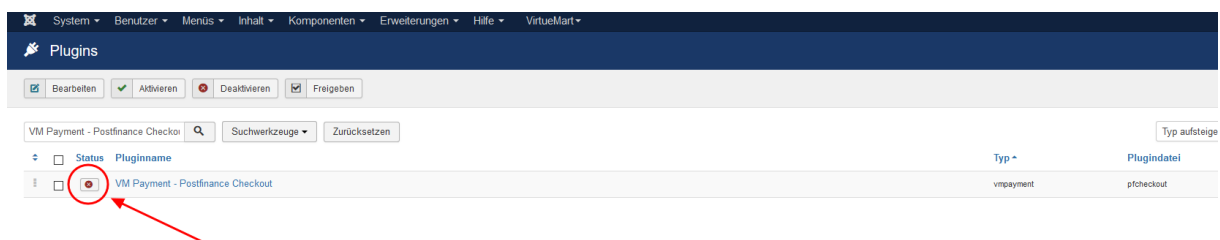

Log in to the administration section of your Joomla website and install the plug-in under **Erweiterungen → Verwalten → Installieren**

The plug-in must be activated in the system first after the installation.

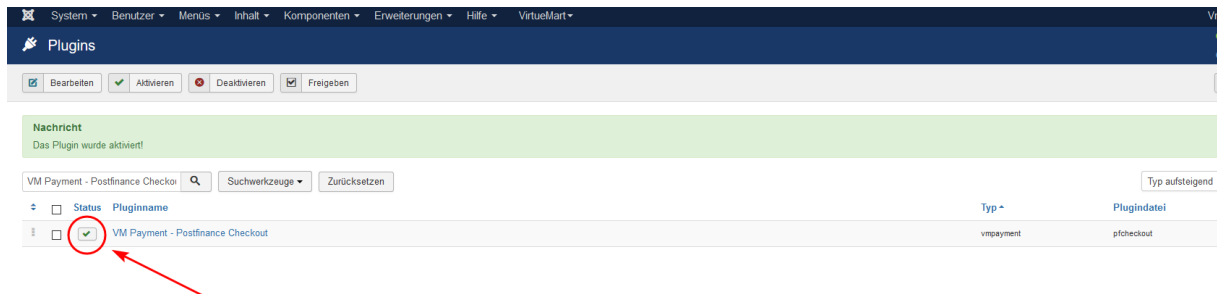

To do this, click on the link to activate the plug-in in the system directly after you have installed it.

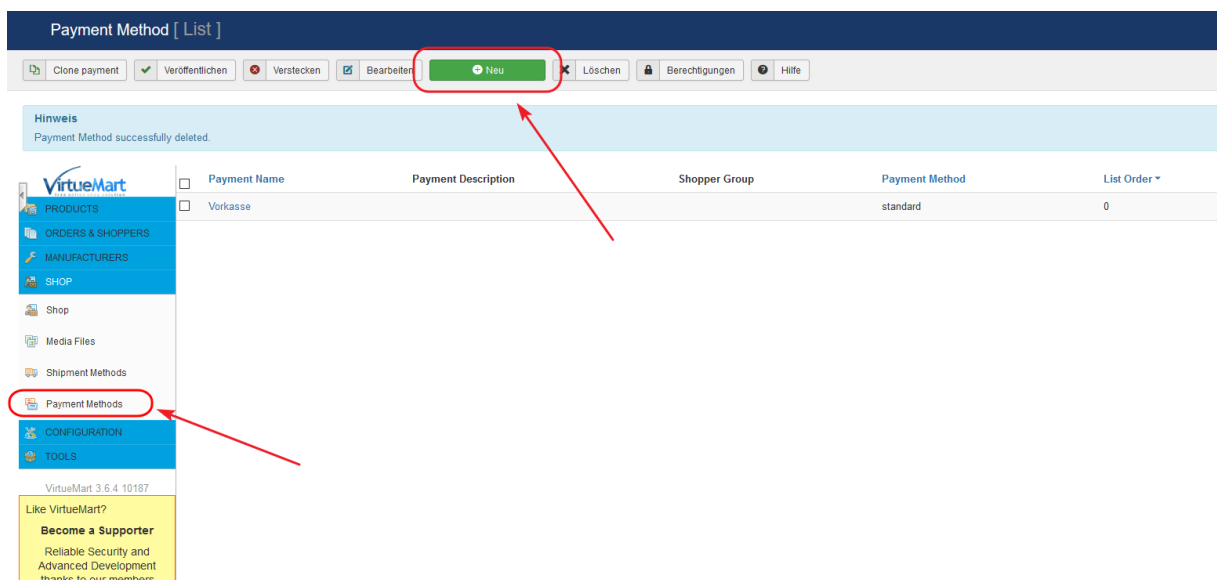

Now activate the plug-in in Joomla Plugin Management by clicking on the symbol with the cross.

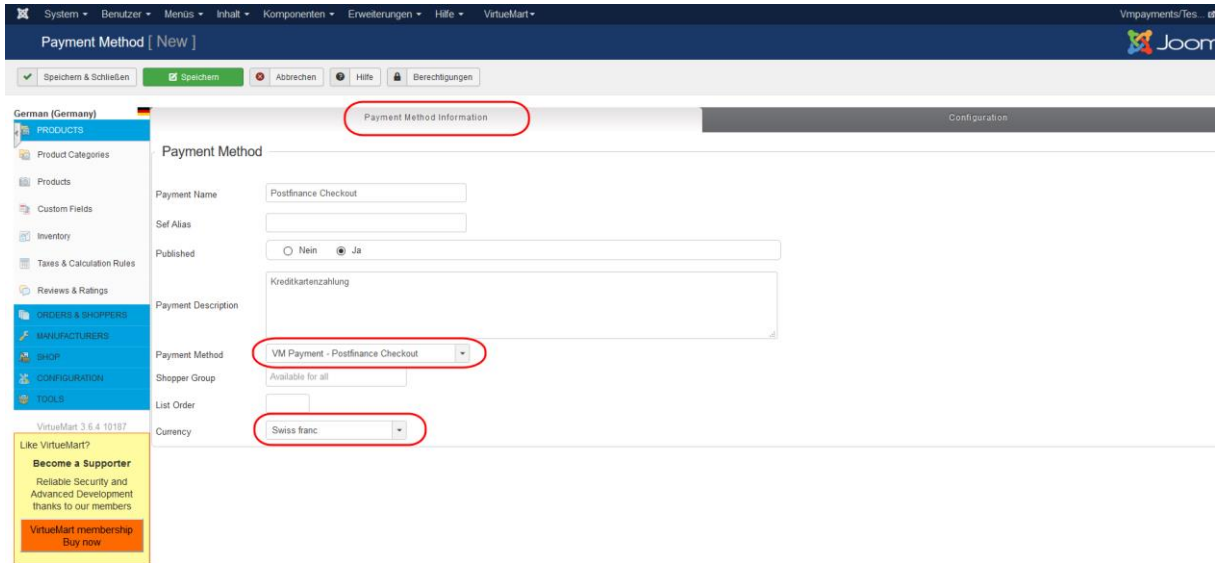

The symbol should now display a tick:

Then go to the VirtueMart shop administration and from there to Payments/Payment Methods and click on "Neu" in this view:

Enter a name for the display in the shop and all other relevant data. For Payment Method (plug-in), please select "VM Payment - PostFinance Checkout". **N.B.:** it is essential to select Swiss francs for Currency at the very bottom.*

Once you have provided the required information, click on **Speichern** at the top and then switch to the **Configuration** tab (in the same view):

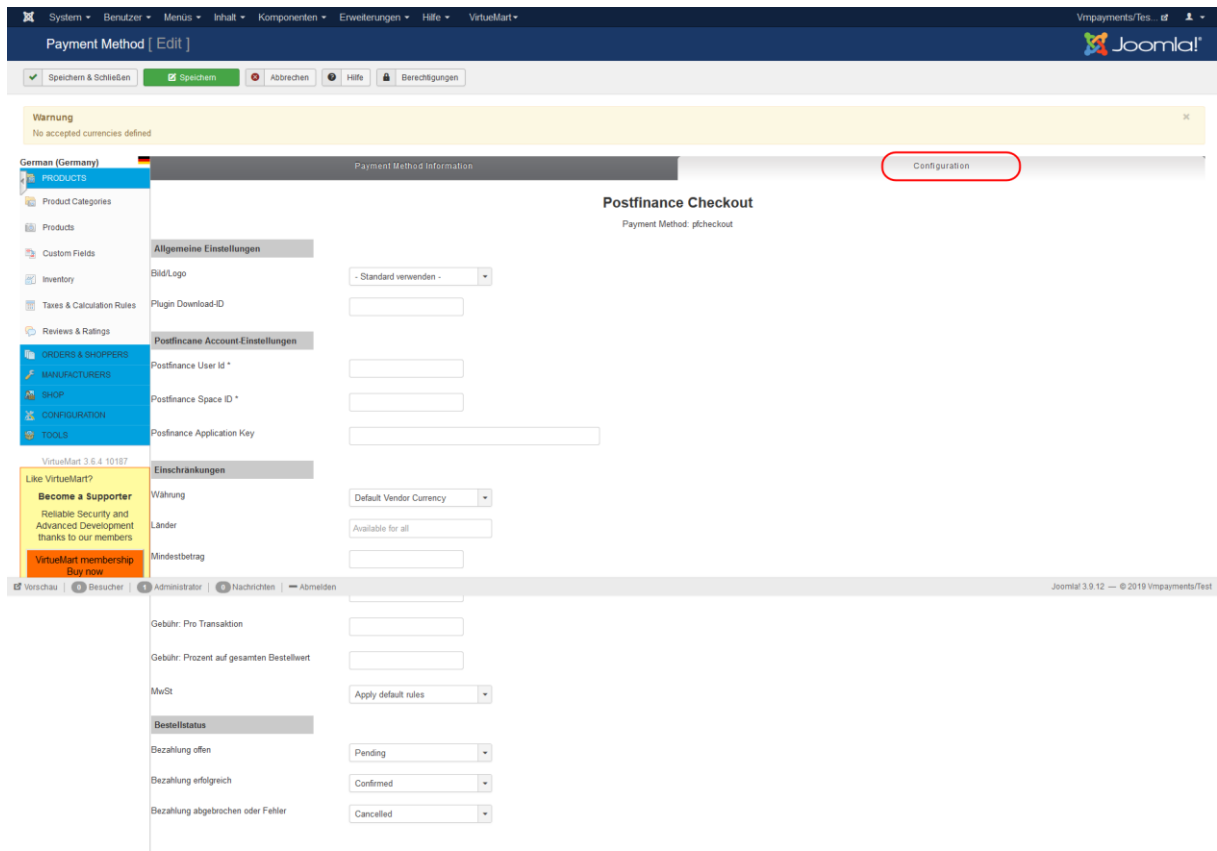

Enter your Masterhomepage download ID under **Allgemeine Einstellungen** to automatically receive important updates.

Please enter your user ID, Space ID and the application key generated in the PostFinance Checkout administration under **PostFinance Account Einstellungen**.

Then enter the information relevant for your shop in **Einschränkungen** and **Bestellstatus** and click on **Speichern & Schliessen**.

Tip:

Additional help texts are displayed when you move your mouse over the form field titles.

Your PostFinance data are verified with the PostFinance system during the saving process. An error message is displayed if any of the information is incorrect or incomplete. Once you have saved everything successfully, the payment method is now set up from the perspective of the shop and can already be tested.

* If you use currencies other than Swiss francs in your shop, the final total for orders will be automatically converted by the shop on the basis of the conversion service chosen in the shop configuration.

[2] Opening your PostFinance Checkout account for the Joomla/Virtue-Mart shop

Product information, requirements and prices

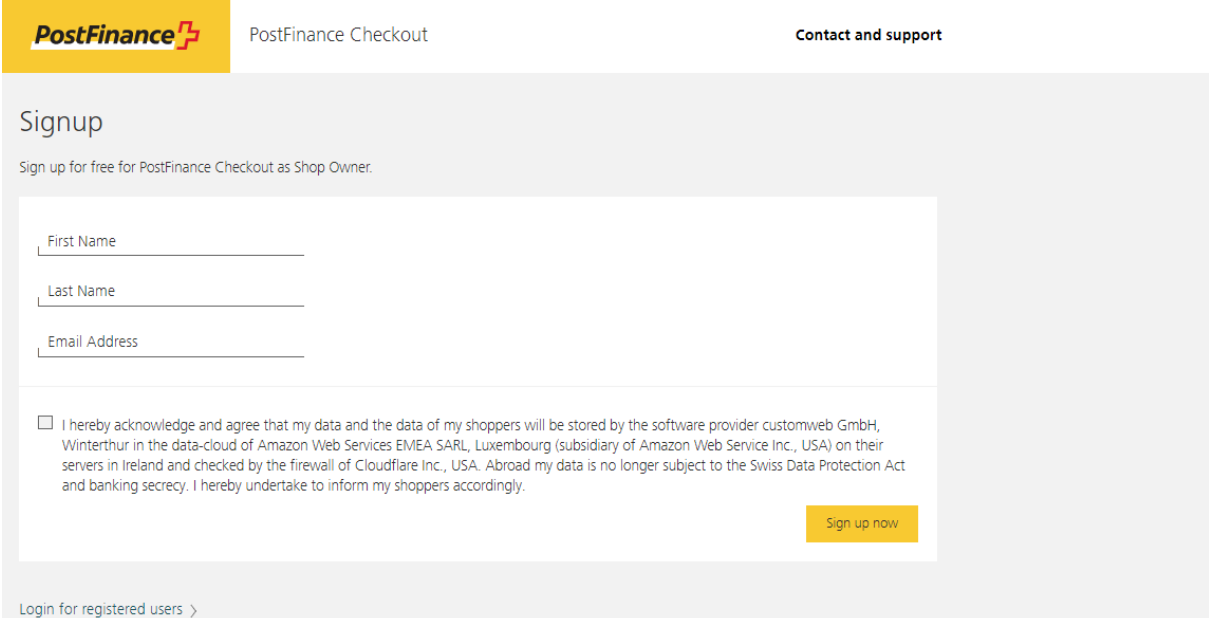

All information on the PostFinance Checkout product can be found here:

<https://www.postfinance.ch/en/business/products/accounts-receivable-solutions/postfinance-check-out.html>

Registration for a free test

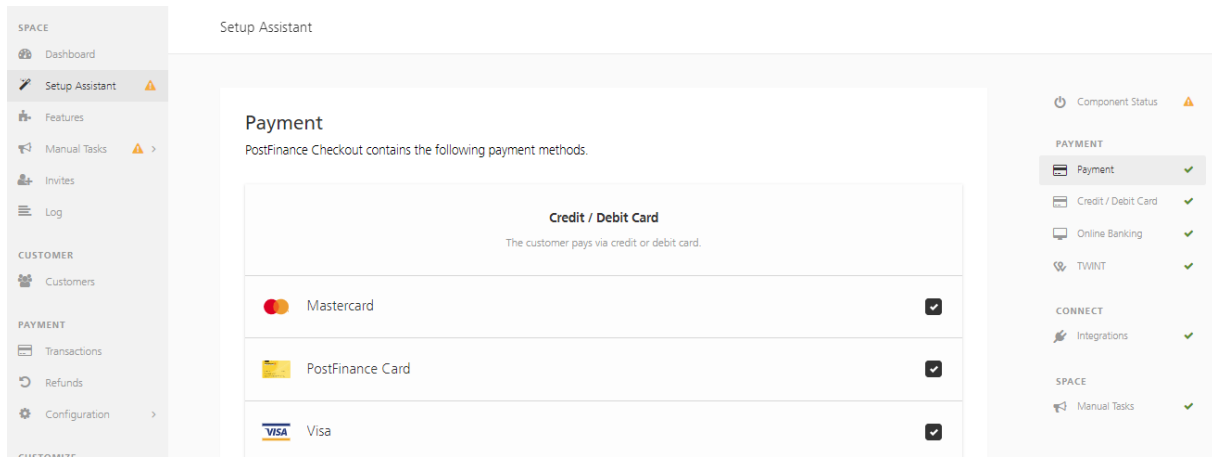

Register your free PostFinance Checkout test account here:

<https://www.postfinance-checkout.ch/en-us/user/signup>

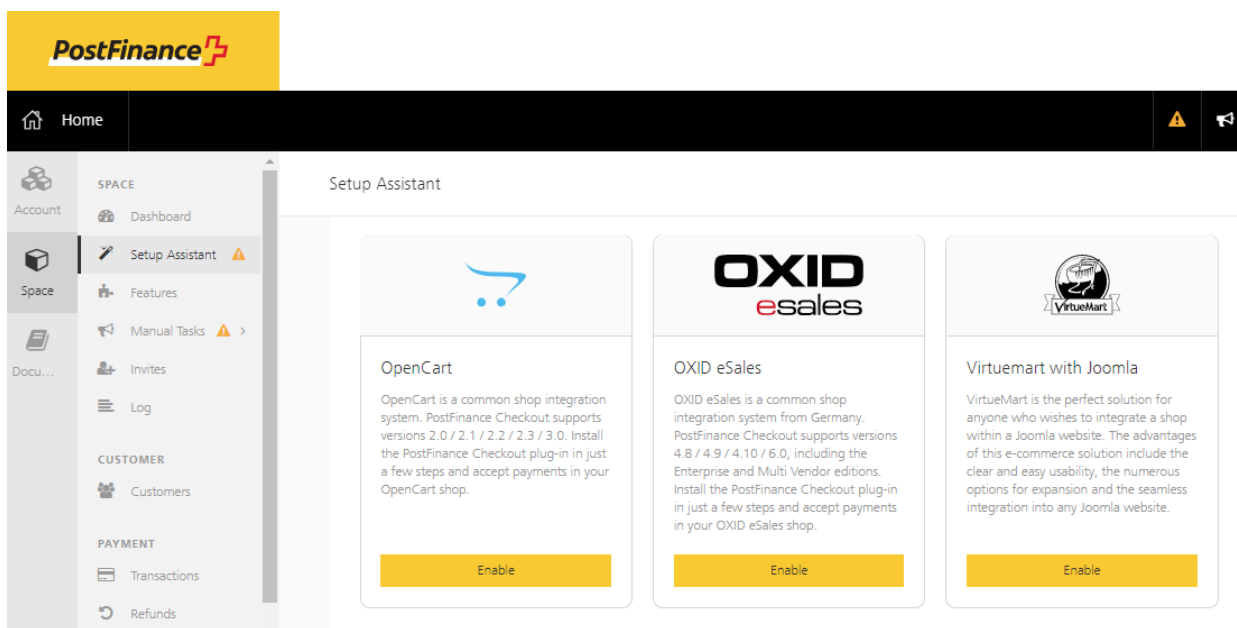

The screenshot shows the PostFinance Checkout website's signup page. At the top left is the PostFinance logo, followed by the text "PostFinance Checkout". On the right, there is a link for "Contact and support". The main heading is "Signup", with a sub-heading "Sign up for free for PostFinance Checkout as Shop Owner." Below this is a form with three input fields: "First Name", "Last Name", and "Email Address". Under the form is a checkbox with a disclaimer: "I hereby acknowledge and agree that my data and the data of my shoppers will be stored by the software provider customweb GmbH, Winterthur in the data-cloud of Amazon Web Services EMEA SARL, Luxembourg (subsidiary of Amazon Web Service Inc., USA) on their servers in Ireland and checked by the firewall of Cloudflare Inc., USA. Abroad my data is no longer subject to the Swiss Data Protection Act and banking secrecy. I hereby undertake to inform my shoppers accordingly." To the right of the disclaimer is a yellow "Sign up now" button. At the bottom left, there is a link "Login for registered users >".

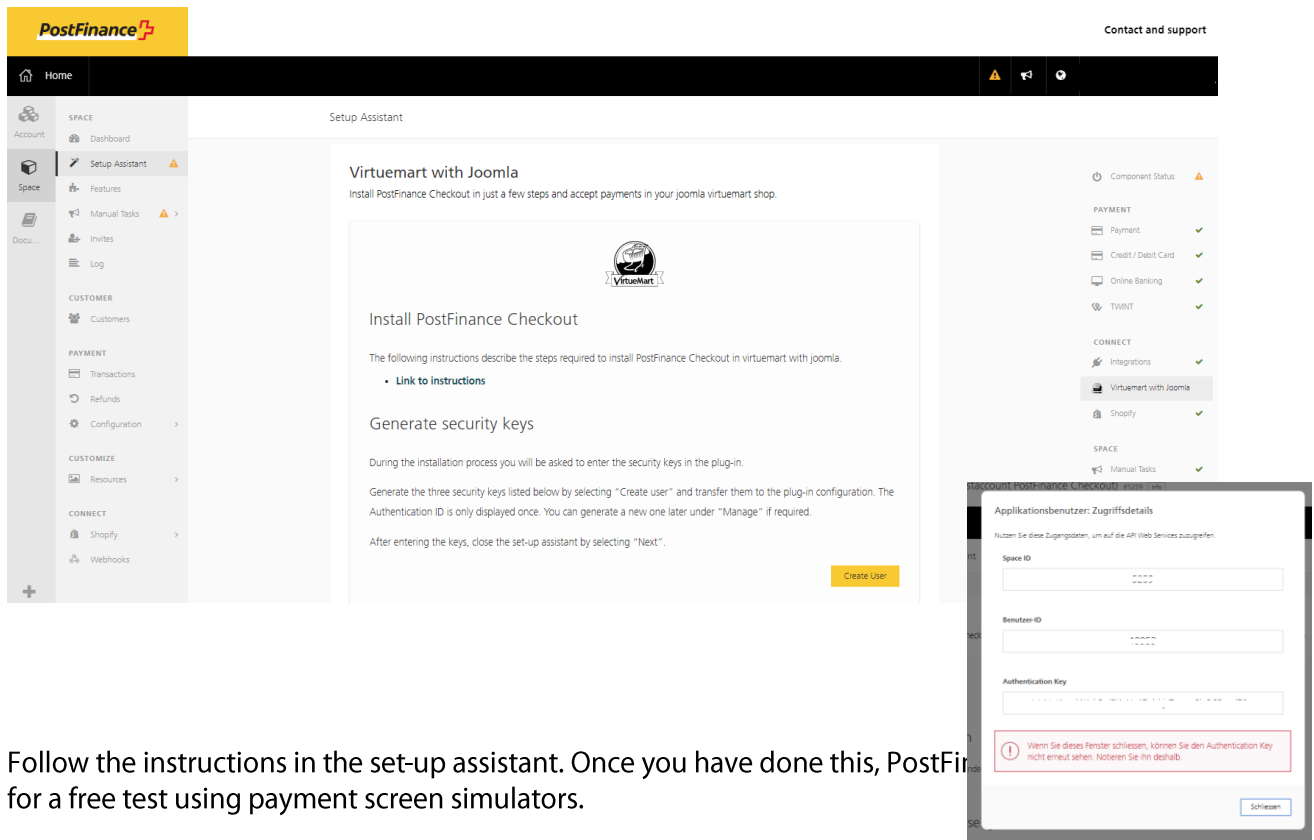

Activate all payment methods in the Payment step:

Activate **“Virtuemart with Joomla”** in the **“Integration”** step:

Then generate the three security keys with **“Create user”** and enter them in the Joomla/VirtueMart shop in accordance with the instructions in section [1]:

Follow the instructions in the set-up assistant. Once you have done this, PostFinance Checkout is ready for a free test using payment screen simulators.

Activation for productive payments

Complete the online contract for activating productive payments.

Once it has been accepted, PostFinance will close all necessary Payment Service Providing and Acquiring contracts and activate all payment methods within 10 working days for you.

The contract can be concluded online in the **"Account"** menu, either by clicking on **"Sign now"** in the header notification **"Sign Contracts"** or directly under **"Payment contracts"**:

Sign Contracts
You are using the trial version. Conclude the contracts to take full advantage of PostFinance Checkout.
